1 KEY UNIT OF COMPETENCY

MSMWHS216

Operate breathing apparatus will provide the skills to operators to check and safely use open circuit self contained breathing apparatus when atmospheres may pose a significant risk to safety during confined space operations.

Breathing Apparatus Training Course

Breathing Apparatus training course includes these 1 key unit of competency:

MSMWHS216 – Operate breathing apparatus. This unit of competency is for workers that may require the use of breathing apparatus due to working in potential hazardous atmospheres, such as confined spaces. Operators may also require the use of breathing apparatus in an emergency situation if they are members of the confined space rescue team.

Course includes theory and practical assessments;

- **Theory Consists of;**
- Powerpoint presentation, equipment familiarisation and risk assessments

- **Practical consists of;**
- Pre-operation checks
- Correct donning, wearing and doffing procedures
- Breathing apparatus control procedures
- Conducting search and navigation with zero visibility
- Emergency and entrapment procedures
- Shutdown and clean up procedures

Duration & Delivery Options:

- Face-to-face: 4 hours
- Blended learning: Online theory + 2 hours face-to-face (recommended)

There is no prerequisite for this course.

Note: Students MUST be clean shaven on the day of training - As per Australian Standards requirement

Successful completion of this training will be awarded the **Statement of Attainment** which will be emailed on completion of the training course.

Course combo: With blended learning, you can include an additional course and complete on the same day - Save 20% of the total pricing when you combine courses!

Breathing Apparatus Training Course
