Confined Space Entry Course - For All Workers

This 1 day course is the minimum requirement for all workers entering and working in confined spaces.

Confined space entry training course Day 1 includes these 3 key units of competency:

RIIWH5202E Enter and work in confined spaces which is the minimum requirement for all workers entering and working in any confined space. The learning outcomes include, confined space awareness, legislative requirements, hazard and risk controls, tools and equipment, entry, exit and clean up procedures.

MSMPER200 Work in accordance with an issued permit provides understanding and training on how permit systems work and to maintain a safe and compliant workplace.

MSMPER202 Observe permit work allows the workers to act as the standby/spotter to ensure all workers inside the confined space are safe and conditions of the work permits are followed.

Do I require training to carry out works in a confined space?

The simple answer is YES! Here at Platinum Safety and Training, we make it easy when it comes to deciding what training you need to carry out work in a confined space.

We have a range of confined space training courses to suit everyone.

Confined Space Entry Course - For All Workers

Duration and Delivery Options:

- Full day of face-to-face: 6 hours
- Blended learning: Online theory + 3-4 hours face-to-face (recommended)

Course includes theory and practical assessments;

- **Theory Consists of;**
 - Powerpoint presentation.
 - Group discussions & group activities such as conducting hazard identification and risk assessments, issuing confined space entry and isolation/hotworks permits.
- **Practical consists of;**
 - Hazard analysis and risk assessments.
 - Creating a rescue plans.
 - Setting up the confined space for entry.
 - Complete isolations (lock out tag out) procedures
 - Ventilation techniques and procedures (natural and mechanical)
 - Gas testing including bump test and calibrations of gas detector units.
 - Directing and following procedures with the issued work permit. This is conducting during 2 x confined space entry activities (1x horizontal entry and 1 x vertical entry – utilising tripods, winches, fall arrest systems, ladders, etc in our specialised confined space training unit – Providing our students with realistic and challenging work spaces.

There is no prerequisite for this course.

Successful completion of this training will be awarded the **Statement of Attainment** which will be emailed on completion of the training course.

Course combo: With blended learning, you can include an additional course and complete on the same day - Save 20% of the total pricing when you combine courses!
