7 KEY UNITS OF COMPETENCY

MSMWHS201

Conduct hazard analysis

RIIRIS201E

Conduct local risk control

MSMPER300

Issue work permits

RIIWHS202E

Enter and work in confined spaces

MSMPER200

Work in accordance with an issued permit

MSMPER202

Observe permit work

MSMWHS217

Gas test atmospheres

2 Day Confined Space Training Course

- For Workers & Supervisors

This 2 day training course will cover all requirements to enable workers to enter confined spaces, to carry out standby duties, gas test atmospheres and to issue all workplace permits including confined space entry permits.

Confined Space Entry Supervisor Training course includes these 7 key units of competency:

RIIWHS202E Enter and work in confined spaces which is the minimum requirement for all workers entering and working in any confined space. The learning outcomes include, confined space awareness, legislative requirements, hazard and risk controls, tools and equipment, entry, exit and clean up procedures.

MSMPER200 Work in accordance with an issued permit provides understanding and training on how permit systems work and to maintain a safe and compliant workplace.

MSMPER202 Observe permit work allows the workers to act as the standby/spotter to ensure all workers inside the confined space are safe and conditions of the work permits are followed.

MSMWHS217 Gas test atmospheres will enable the operator to test atmospheres using a range of testing equipment in order to determine a safe atmosphere for workers. The competency requires the operator to safely take and interpret gas readings and take the appropriate actions.

MSMWHS201 Conduct hazard analysis & RIIRIS201E Conduct local risk control which will cover hazard and risk identification within the workplace, including creation and implementation of hazard analysis tools such as

- * Job safety analysis (JSA)
- * Safe work method statement (SWMS)

MSMPER300 Issue work permits covers the understanding and limitations of the permit system. As the competent permit issuer, you will be making decisions regarding the need for permits and ensure the conditions are implemented.

2 Day Confined Space Training Course

- For Workers & Supervisors

Duration & Delivery Options:

- · Face-to-face: 2 days 6 hours per day
- Blended learning: Online theory + 1 day face-to-face (recommended)

Course includes theory and practical assessments;

- · Theory Consists of;
- 1. Powerpoint presentation.
- 2. Group discussions & group activities such as conducting hazard identification and risk assessments, issuing confined space entry and isolation/hotworks permits.
- · Practical consists of;
- 1. Hazard analysis and risk assessments.
- 2. Creating a rescue plans.
- 3. Setting up the confined space for entry.
- 4. Complete isolations (lock out tag out) procedures
- 5. Ventilation techniques and procedures (natural and mechanical)
- 6. Gas testing including bump test and calibrations of gas detector units.
- 7. Directing and following procedures with the issued work permit. This is conducting during 2 x confined space entry activities (1x horizontal entry and 1 x vertical entry utilising tripods, winches, fall arrest systems, ladders, etc in our specialised confined space training unit Providing our students with realistic and challenging work spaces.

There is no prerequisite for this course.

Successful completion of this training will be awarded the **Statement of Attainment** which will be emailed on completion of the training course.

Course combo: With blended learning, you can include an additional course and complete on the same day - Save 20% of the total pricing when you combine courses!
